

Multiple Choice Test 5 - Cell Biology and Organisation - OPTIONAL FOR REVISION

Quiz set by Mrs. L. OLIVER for Year 11/11S/Sc6

1) Which of the following is a non-communicable disease?

- Cancer
- Hepatitis A
- Tuberculosis
- Measles

2) Which of the following is not carried in the blood plasma?

- Carbon Dioxide
- Glucose
- Hormones
- Oxygen

3) What is the role of a statin?

- They are inserted into an artery to keep them open
- It can be used to pump blood around the body whilst waiting for a transplant
- They reduce the amount of 'bad' cholesterol in the bloodstream
- It is used to repair leaky valve

4) What does the circulatory system carry to every cell in the body?

- Food and Oxygen
- Hormones and Urea
- Food and Carbon Dioxide
- Glucose and Amino Acids

5) Which of the following food tests will test for glucose?

- Iodine solution
- Ethanol
- Benedicts solution
- Biuret solution

6) Which organ produces protease, amylase and lipase?

- liver
- pancreas
- stomach
- gall bladder

7) What is the role of bile?

- Break down carbohydrates into simple sugars
- Release acid into the stomach and digest proteins
- Neutralise stomach acid and emulsify fats
- Allows peristalsis in the oesophagus

8) Which of the following will not affect the rate of an enzymatic reaction in digestion?

- Amount of light
- Temperature
- pH
- The amount of enzyme

9) Which is the largest unit of organisation?

- tissue
- organ
- cell
- organism

10) Which structure allow gases to enter and leave a leaf

- xylem
- chloroplast
- stomata
- root hair

11) Which method allows substances to be absorbed against a concentration gradient?

- Active transport
- Passive transport
- Diffusion
- Osmosis

12) Which of the following is not a cell specialisation?

- nerve cells are specialised for rapid signalling
- Sperm cells are specialised for reproduction
- phloem and xylem cells are specialised for photosynthesis
- muscle cells are specialised for contraction

13) Which of the following is not in a bacterial cell?

- cell membrane
- mitochondria
- cell wall
- cytoplasm

14) Which of the following statements is correct?

- The smaller the sample size the better
- A large sample size means that results are not repeatable
- A sample should represent a small part of a population
- The bigger the sample size the better the investigation

15) What must a cell do before it duplicates the DNA?

- Grow
- Shrink
- Decrease the amount of mitochondria?
- Divide
