

C7.3 Separating Quiz

Quiz set by Ms. T. wint for Year 7/7TF/Sc

1) How many different atoms are there in a compound?

- two or more
- always twp
- one

2) Does this show an element, a mixture or a compound?

- compound
- mixture
- element

3) Which is the best way to get salt from salty water?

- distillation
- filtration
- evaporation

4) Pure water can be separated from inky water by simple distillation. This is because

- water and ink have different boiling points
- ink evaporates leaving the water behind
- water evaporates leaving the ink particles behind

5) What is the correct order for obtaining salt from a mixture of sand and salt?

- filtration - dissolving in water - evaporation
- evaporation - filtration - dissolving in water
- dissolving in water - filtration - evaporation

6) Which method is usually used to separate coloured substances from each other?

- simple distillation
- evaporation
- chromatography

7) This picture shows:

- crystallisation (sometimes called evaporation)
- simple distillation
- chromatography
- filtration

8) This picture shows:

- filtration
- crystallisation (sometimes called evaporation)
- chromatography
- simple distillation

9) This picture shows:

- filtration
- crystallisation (sometimes called evaporation)
- chromatography
- simple distillation
